eCourse Information:

The Motorcycle Safety Foundation (MSF) created the Basic eCourse for motorcycle safety programs around the country to use as a replacement for four hours of in-person learning. The content is the same as what we would cover in the four hour weeknight session of a Basic RiderCourse. It IS NOT a complete safety training course; you must also participate in the hands-on portion of a class in order to have a complete course.

Taking the eCourse directly from the MSF will cost you $19.95 and only gives you access to the online training; it does not give you access to the hands-on portion through our program. However, if you register for an eCourse BRC with us you will be provided with access to the online training (at our expense) and you will be registered for the hands-on portion of a complete Basic RiderCourse.
